

The ALLOphone App

iPhone/Apple Set-up Instructions

1. Call an ALLO representative at **866-481-ALLO** to activate the ALLOphone App service and get your 4-digit PIN code.
2. Search the App Store for **Accession Communicator** and download the application.*

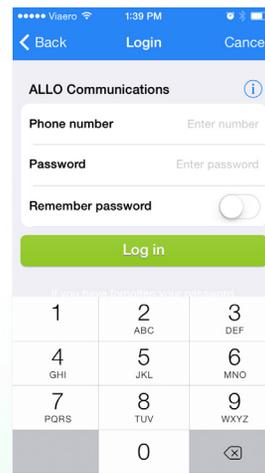

3. Once the download is complete, choose **ALLO Communications** as your Carrier.

4. Select your call settings and press accept.

5. Enter your home or business phone number as well as the 4-digit number given to you by ALLO.

*Accession requires Wi-Fi, 4G or LTE service to send or receive calls. When outside of those services, simply Forward All Calls to your preset mobile number (from Call Manager in Accession).

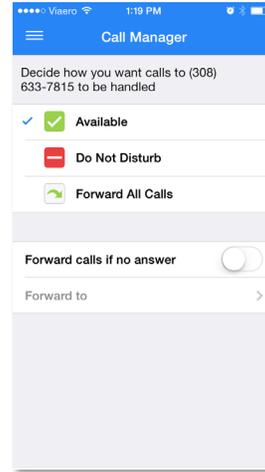

6. Enter your cellular number on this screen.

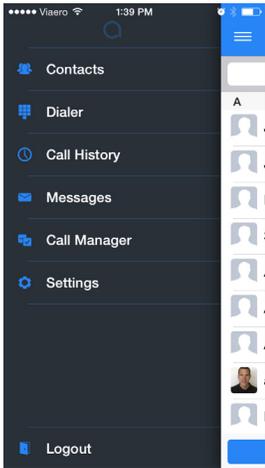

8. Call Manager Screen:

How do you want our calls to be handled?

- Available
- Do Not Disturb
- Forward all calls to cell phone
- Forward calls if no answer

7. Once you have launched the App, options are listed on the left hand screen:

9. Account Settings:

Use Wi-Fi only if you only want to receive calls while on Wi-Fi network and not a cellular network.
